## Available to hire

Dehumidifier to suit 30/40 hp fan, this is the first new Welvent dehumidifier for 20 years. The unit has been designed in-house and built by our own engineer in-house.

The unit has its own fan unit so it needs no physical connection to the fan unit. The unit can simply be stood in front of the fan inlet, or duct work can be added to blow the air where it is received.
